

Case presentation
Dept. of Otorhinolaryngology (ENT)
Jorhat Medical College & Hospital, Jorhat
From January, 2017 till date

1. "A case of unsafe type of C.S.O.M. with cholesteatoma with mastoid abscess (Rt.)"

Date : 15/02/2017; Time: 4:30 PM; Venue: Seminar Room, dept. of ENT, JMCH

Presented by : Dr. Florence Ratna Borah, Senior Resident Surgeon, ENT

2. "A case of foreign body coin in the Laryngeal Inlet"

Date : 13/05/2017; Time: 4:30 PM; Venue: Seminar Room, dept. of ENT, JMCH

Presented by : Parijat Saha, MBBS Intern

3. "A case of Ludwig's Angina"

Date : 06/09/2017; Time: 5:30 PM; Venue: Seminar Room, dept. of ENT, JMCH

Presented by : Dr. M. N. Khan, Registrar, ENT

4. "A case of penetrating injury to neck"

Date : 20/01/2018; Time: 5 PM; Venue: Seminar Room, dept. of ENT, JMCH

Presented by : Gariyashee Lahkar, MBBS Intern

5. "A case of carcinoma glottic region on left side Stage T3, NO, MO"

Date: 10/05/2018; Time: 5 PM; Venue: Seminar Room, dept. of ENT, JMCH

Presented by : Cheng Madhusmita Shyam, MBBS Intern

6. "A case of Hypertensive Epistaxis"

Date : 14/06/2018; Time: 5 PM; Venue: Seminar Room, dept. of ENT, JMCH

Presented by : Ananya Anurabh Gogoi, MBBS Intern

7. "A case of parotid swelling (Rt.)"

Date : 14/06/2018; Time: 5 PM; Venue: Seminar Room, dept. of ENT, JMCH

Presented by : Dr. Hirina Basumatary, MBBS Intern

Professor & HOD, ENT
Jorhat Medical College
Jorhat

Date : 15/2/17

Case presentation :

Time : 4-30 P.M

Venue : Seminar Room ENT

" A case of Unsafe type of C.S.O.M. & cholesteatoma
in Mastoid abscess. (Rt) "

Name of patient : Mr Sarunai Bora

Age : 35 yrs. Sex : F/H

Address : Titabor, Dist : Jorhat

Date of Admission : 15/2/2017

Hosp. NO. : 18361/17

Presentation by : Dr. Floxanee Ratna Bora
Senior Resident Surgeon ENT

Moderator : Dr Hiranaya Bora Saikia
(Prof & H.O.D)

Questions asked :

1. What are the types of C.S.O.M. ?
2. Theories behind cholesteatoma formation ?
3. What is cholesteatoma ?
4. What are the hidden areas for cholesteatoma in the middle ear ?
5. What type of surgery is done in cholesteatoma
6. What to do if cholesteatoma is found to be adhered to the vital structure like facial nerve or facial canal or lateral semi canal (L.S.C.C) ?

Time : 5 P.M.

Venue : Seminar Room ENT

Case Presentation :-

"A case of Penetrating injury to neck."

Name of the Patient : Raju Saikia.

Age : 48 yrs Sex : Male.

Address : Dhekia Khawa Dist : Jorhat, Assam.

Date of Admission : 16 / 01 / 18

Hospital No : 8129 / 18.

Presented by — Graiyashee Lakkar.
(MBBS Intern)Questions asked :

- ① Structures that were injured in this case ?
- ② What are the signs present in this case ?
- ③ Was there any haematemesis / Melaena ?
- ④ Clinical features of injuries to trachea ?
- ⑤ Clinical features of injuries to esophagus ?
- ⑥ How to manage such a case ?
- ⑦ What is the management of rupture / injuries to esophagus ?
- ⑧ What is Mousseau - Barbin tube ?

- ⑨ What are the features of injury to thyroglossal Duct?
- ⑩ Was tracheostomy required in this case?
- ⑪ What are the different types of tracheostomy?
- ⑫ How to examine the subglottic region of larynx & trachea?
- ⑬ What is tracheo-esophageal fistula?
- ⑭ How to diagnose it?
- ⑮ What is the management?
- ⑯ How will you divide the fascia in the neck?
- ⑰ What are the different spaces in the neck?

Date: 10/5/18

Time: 5: P.M.

Venue: Seminar room
E.N.TCase Presentation :

"A case of carcinoma glottic region on left side Stage T3, N0, M0"

Name of the patient: Mr. Bhaben Saama

Age: 55 yrs Sex: Male

Address: Teok Dist: Jorhat, Assam

Date of Admission: 12/04/18

Hospital No: 77211/18

Presented by — Cheng Madhusmita Shyam
(HBBS Intern)

Questions asked :

① How will you classify carcinoma larynx?

② How is the staging done for carcinoma larynx?

③ What is the first symptoms of carcinoma glottis & why?

④ What is the first symptoms of carcinoma Supraglottic & why?

⑤ What is Reinke's space?

⑥ What is Saccule?

⑦ How will you examine the saccule?

- ⑧ What are the muscles of larynx?
- ⑨ What are the membranes of larynx?
- ⑩ What are the layers of true vocal cord?
- ⑪ Causes of fixed vocal cord?
- ⑫ Causes of vocal cord palsy?
- ⑬ Causes of recurrent laryngeal nerve?
- ⑭ Which is longer & why?
- ⑮ Which nerve is more prone to injury during surgery?
- ⑯ What are the grades of True vocal cord Palsy?
- ⑰ How will you manage the case?
- ⑱ What is conservative laryngeal surgery?
- ⑲ How much radiation is given to carcinoma larynx?
- ⑳ What is Adjuvant chemotherapy?
- ㉑ What is Neo-Adjuvant chemotherapy?
- ㉒ What is Concurrent chemotherapy?
- ㉓ How to do post operative Rehabilitation of voice?

Date: 14/6/18

Time: 5 P.M.

Venue: Secior Room
ENT

"A case of Hypertensive epistaxis"

Name of pt: Mr. Upen Hajariya

Age: 52 yrs. Sex: Male

Add: Nimali-Borali Dist: Jorhat Assam

Date of admission: 12/6/18.

Hosp. NO. : 113675/18.

Presented by: — Ananya Anurabh Gogoi
(MBBS intern)

Moderator: Dr. Rupanjita Saengma (Assec. prof.)

Question asked:

1) What are the different causes of epistaxis?

2) In which age group is hypertensive epistaxis more common?

3) Why, which type of epistaxis is more common in hypertension?

4) What is Kisselback's plexus? What is Woodruff's plexus? In which areas are these plexus situated?

5) Why a patient with DNS. may have epistaxis?

6) How will you manage the case?

7) How to manage posterior epistaxis?

8) What is nasopharyngeal angiofibroma? In which age group is it most common?

9) What is fossa of Rosenmüller?

10) A child of 3 years of age with unilateral foul smelling blood stained discharge. What is your diagnosis?

11) How is SMR/septoplasty a surgical treatment for epistaxis?

12) Recent management strategies of epistaxis?

Presence:

1) Prof & H.O.D.
Dr. H. P. Saikia

case- presentation

" A case of parotid swelling (Rt) "

Date: 14/6/18

Time: 5 P.M.

Venue: Seminar Room
E.N.T

Name of pt: Jume Das, Age 44 yrs, sex: F/H

Add: Kumeabahi; Bokakhat, Dist: Golaghat.

Date of admission: 11/6/18

Hosp. NO: 95628/18

presented by: Dr. Hirina Basumaty (M.B.B.S. Intern)

Moderator: Dr. Mukul Patra

Questions asked:

① What are the different major salivary glands?

② Sites of minor salivary glands.

③ What are the different benign tumours of the salivary gland?

④ Which benign tumour is most common & which is the affected gland?

⑤ What are the different malignant tumours of the salivary glands?

⑥ What is the cause of the facial nerve?

⑦ What is sialolithiasis & which gland is most commonly affected?

⑧ What is Wharton's duct? What is Stensen's duct?

⑨ Why is submandibular gland most commonly predisposed to develop sialolithiasis?

10). What is ranula? Mucocoele?

11). What is the microscopic appearance of pleomorphic adenoma?

12). Is pleomorphic adenoma encapsulated?
If not why?

13). In case of a revision ~~stage~~ surgery for recurrent pleomorphic adenoma how will you find the ~~course~~ of facial course of the Facial Nerve?

14). Where does Stenson's duct open? and where do Wharton's duct open?
